Local support in EMV certification testing for banks

ENSURE QUICK MARKET ROLL OUT

Certification is an important step in any go-to-market process, but it can be challenging. For example, each payment brand has its own specific test requirements and processes. FIME, together with its local partner Alhamrani Universal (AU), provides you with best-in-class consultancy, test tools and test services to considerably reduce time-to-market. AU's local presence ensures that project set-up and follow-up is done locally, and FIME tools are delivered efficiently from local stock.

COMPREHENSIVE TESTING WITH LOCAL SUPPORT

Banks often need extra resources to complete their certification projects. But it can be difficult to confidently locate and qualify the necessary certification expertise without putting projects at risk. Outsourcing to FIME's experts, via AU, significantly accelerates the certification process, delivering the results you expect while reducing costs and minimizing the risk of missed production deadlines.

SINGLE POINT OF LOCAL CONTACT

The FIME-AU partnership localizes FIME's expertise, enhancing the end-to-end customer experience. Our partner is recognized across the Middle East, particularly in Saudi Arabia, as a leader in electronic banking solutions. Benefit from FIME's accredited formal approval services, and highest-quality certification tools and services, all with localized support and contact through AU.

+ KEY BENEFITS

- One-stop shop for all certification projects.
- FIME's extensive experience in multi-brand certification testing.
- Quick delivery of FIME test tools from AU's stock.
- AU's local support and follow-up for certification projects.
- Better communication and increased understanding.
- Rapid and efficient project completion thanks to joint expertise in project delivery.

"Our companies present a united front and are committed to helping banks achieve success."

Tariq ABDAT, CEO of Alhamrani Universal

"We have found the perfect partner to help us deliver even better local support and considerably reduce time-to-market for banks in Saudi Arabia."

Lionel GROSCLAUDE, CEO of FIME
