FIME®

One Action. **A billion transactions.**

Validate your EMV cards with FIME

ACHIEVE BRAND CERTIFICATION QUICKLY AND EFFICIENTLY

EMV specifications and payment brand requirements mean that issuing debit, credit or prepaid cards can be complex.

The personalization validation process aims to ensure that issued cards are interoperable and behave consistently once in the hands of the consumer. This process, however, can be costly and time consuming if it is not performed with the right partner.

Throughout the process, you may need help to:
- Be aware of specific brand processes to avoid unplanned delays.
- Select the card profile.
- Complete the ICS form to make sure card profile parameters are correctly set.
- Understand any EMV and brand errors through clear explanations.

With FIME's unrivalled capacity, worldwide presence and multi-brand offering, you can rely on us to deliver your card issuance project effectively and efficiently.

GET GUIDANCE FROM OUR EMV EXPERTS

FIME is the worldwide leader in personalization validation services and is accredited by major international and local payment networks to perform services on their behalf.

Our unique, market leading industrialized process, combined with our team of experts and worldwide capacity, enables us to deliver high volume projects quickly and efficiently.

FIME is always up to date with the latest specifications for each region, and has developed a high quality system to ensure coordination with the relevant certification bodies.

Starting a certification project with FIME is easy. There is no need to book any timeslots and if you have an urgent deadline to meet, just let us know.
