## About the customer

The company is one of Taiwan's main telecommunications operators. Its offerings include domestic and international fixed communication, mobile communication, broadband, and internet services.

## The challenge

This project was the first HCE mobile payment integration for the telecommunications company.

For Fime and its security lab partner, the major challenge was to answer all of the technical questions and to guide the company's development team through the unfamiliar functional and security aspects of the integration.

Senior consultant at Fime

## Customer requirements

A major player in the Taiwanese telecommunications market needed support from Fime's consulting experts during the early phases of its integration of the Mastercard tokenization platform (MDES). This would finally enable the provider to offer mobile payment services virtually to all of its subscribers.

## Fime's solution

The Fime consulting team supported the company in the integration of the MDES "tokenization" platform and in the certification of the solution. To this end, Fime consulting:

- Trained the operator on the open-loop mobile payment ecosystem.
- Delivered a series of workshops to analyze the feasibility of the project.

### Training

- OEM Pay Program (Apple, Samsung, Android Pay).
- Mastercard specification on Cloud-Based Payment (MCBP).
- Test and evaluation audit on the integration of MDES.

### Feasibility workshops

- Functional evaluation.
- Safety evaluation.

## Working with Fime

Throughout the project, Fime:

- Provided flexible, on-demand support, with the team available onsite when needed.
- Delivered strong technical consultancy across functional & security requirements.
- Maintained a close, responsive relationship to remain agile to customer needs.

## Making innovation possible.

With our global perspective, we combine our consulting and disruptive testing expertise to enable our clients to develop build and launch trusted digital payment experiences solutions across payments, banking and urban mobility.
