MP300 production test tools services

Ensure continuous and reliable smartcard production testing.

MP300 production test tools service continuity.

Supporting your MP300 equipment until the next generation arrives.

Fime is reactivating support services for the **MP300** series of production test tools (testers and couplers) used in smartcard and chip personalization and testing. While the **MP300** hardware remains end-of-life, these devices are still critical in many production environments. Fime offers maintenance, repair, diagnostics, calibration and firmware updates for the **MP300** range as a bridge until a new test platform is available. This ensures your production lines keep running smoothly.

How it works.

- **Contact Fime.** Submit a service request with your MP300 model(s) and a description of required support.

- **Expert servicing everywhere.** Our technicians perform diagnostics, maintenance, calibration and any needed hardware / firmware repairs on-site and off-site.

- **Return to production.** We return your serviced MP300 tools along with documentation and updated calibration certificates so you can resume production without interruption.
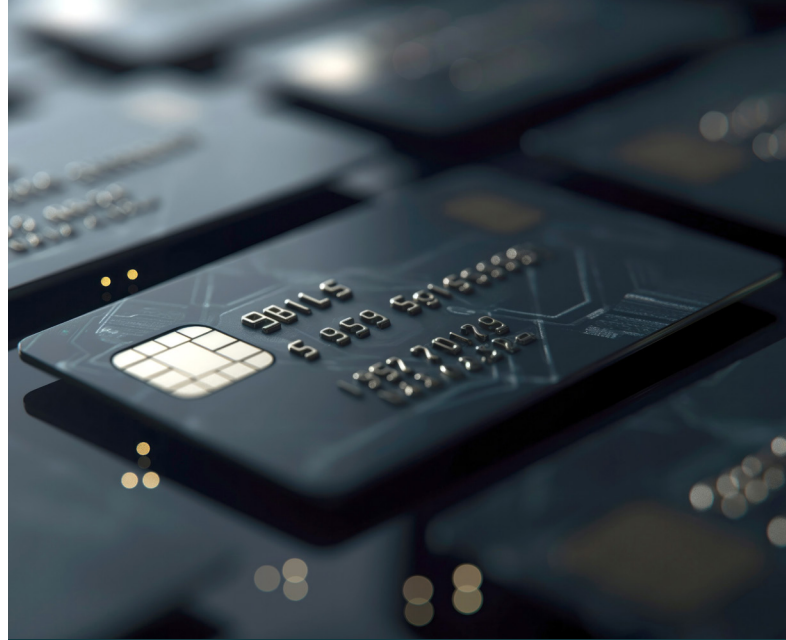

Fime can help you at any stage of your project lifecycle.

Key benefits

- **Continuity of production.**
  Keep MP300 test equipment operational to avoid costly downtime. Effective maintenance and rapid repair minimize production disruption.

- **Full-service coverage.**
  Fime provides comprehensive servicing for all MP300 models (C3, CL3, C3+CL3, MX1, MCL1, plus all other variants, racks and accessories). Services include preventive maintenance, diagnostics, hardware repair, calibration and corrective firmware maintenance.

- **Expertise & trust.**
  Service is delivered by Fime's expert engineers former Micropross who designed MP300 tools.

What we offer.

Service	Description	MX1/MCL1	C2/CL2/MT1	C3/CL3
Technical support	• Technical support provided via helpdesk ticketing system. • Dedicated conference call with MP300 experts on demand.	✔	✔	✔
Firmware update	• Corrective firmware updates to fix issues.	✔	✘	✔
Repair services	• Hardware repairs with commitment to root cause analysis. • Includes a calibration.	✔	✔	✔
Calibration services	• Regular calibration to ensure operational accuracy. • On-site and off-site.	✔	✔	✔
Replacement	• Includes a calibration.	On demand	✘	On demand

Tools supported.

Module	Designation
Coupler	MP300 MX1
	MP300 MCL1
	MP300 MX1+MCL1
Tester	MP300 C3
	MP300 CL3
	MP300 C3+CL3
	MP300 C2+CL2
	MP300 MT1
Rack	1 slot
	4 slots
	8 slots
	16 slots
Antenna and accessory	Communication and Resonance Frequency Measurement Antenna
	MP ESC Dual
	Antenna Emitter – 60x40mm – SMB
	VHBR Antenna 60 x 40mm
